EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Bruno Polito on September 29, 2006.

The application has been amended as follows:

Regarding claim 2. (Currently amended) in line 17, "~~number~~ numbers added to said"

Regarding claim 3. (Currently amended) in line 17, "~~number~~ numbers added to said"

Allowable Subject Matter

2. Claims 2, 3 and 6-11 are allowed over prior art.
3. The following is an examiner's statement of reasons for allowance: Applicant has canceled previously rejected claims 1, 4 and 5, and amended previously objected to claims 2, 3 and 6 to include previously indicated allowable subject matter. As indicated in the previous office action claims 7-9 contain allowable subject matter.

The prior art fail to teach or suggest with respect to claim 2, dividing asynchronous information to be transmitted from a high order layer into packets in sequence at a predetermined fragment size, writing a most recent sequence number buffered in said transmission buffer in a buffer pointer, and adding a sequence number starting from a value of a buffer point when asynchronous information is next divided into packets, with respect to claim 3, dividing asynchronous information to be transmitted from a high order layer into packets in sequence at a predetermined fragment size, writing a most recent sequence number buffered in said transmission buffer in a buffer pointer and storing packets up to a value indicated by a total sequence-number space for the packet for which acknowledgement information is received from said wireless transmission apparatus of the information transmission destination minus one, when asynchronous information is next divided into packets, with respect to claim 6, selection-repeat-resend-type automatic resend request control, wherein only a packet which has not been received is selected and re-transmitted, with respect to claim 7 and 9, a wireless method utilizing selection-repeat-resend type automatic resend request control wherein a high-order-bit identification pointer for indicating the position in the total sequence-number space to which a low-order bit-map-space area, and virtually performing transmission control in the total sequence-number space by repeatedly using a low-order bit-map-space area and high-order-bit

identification pointer, with respect to claim 8, storing the most recent sequence number buffered in buffering means as a buffer pointer, and a sequence number adding means for reading value of the buffer point and adding a sequence number when asynchronous information is next buffered.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prenell P. Jones whose telephone number is 571-272-3180. The examiner can normally be reached on 9:00-5:30.
